STAT

Tom -

You may recall that my proposal to do a base-line study of foreign media sources and the adequacy of FBIS coverage was approved for use in out-year planning.

As a first step [Redacted] has prepared the attached pilot project for the purpose of developing the study scope and approach. We intend to review this pilot effort next Tuesday at an FBIS staff meeting to make plans for the full study.

STAT

If you think anyone in the O/DD&T would be interested in looking at this and giving me their thoughts, please pass it to them.

LOGNOTE - Chief, Austrian Bureau - 22 December 1981

LEO CHERNE MEETING. While attending a party [redacted] the evening of 18 December 1981, I took the opportunity to introduce myself to and chat with Mr. Leo Cherne, chairman of PFIAB under President Ford and deputy chairman of President Reagan's intelligence advisory body. Most of the conversation with Mr. Cherne was non-business in nature, but I did give him a brief overview of FBIS' East European coverage effort. Mr. Cherne noted that he was traveling with a shortwave receiver in his effects and asked for the frequencies for some good news casts in English so he could stay current with world events. I offered to provide him some likely frequencies the next morning [redacted]
